“ASTEROID CITY”

Methodology & Quirks

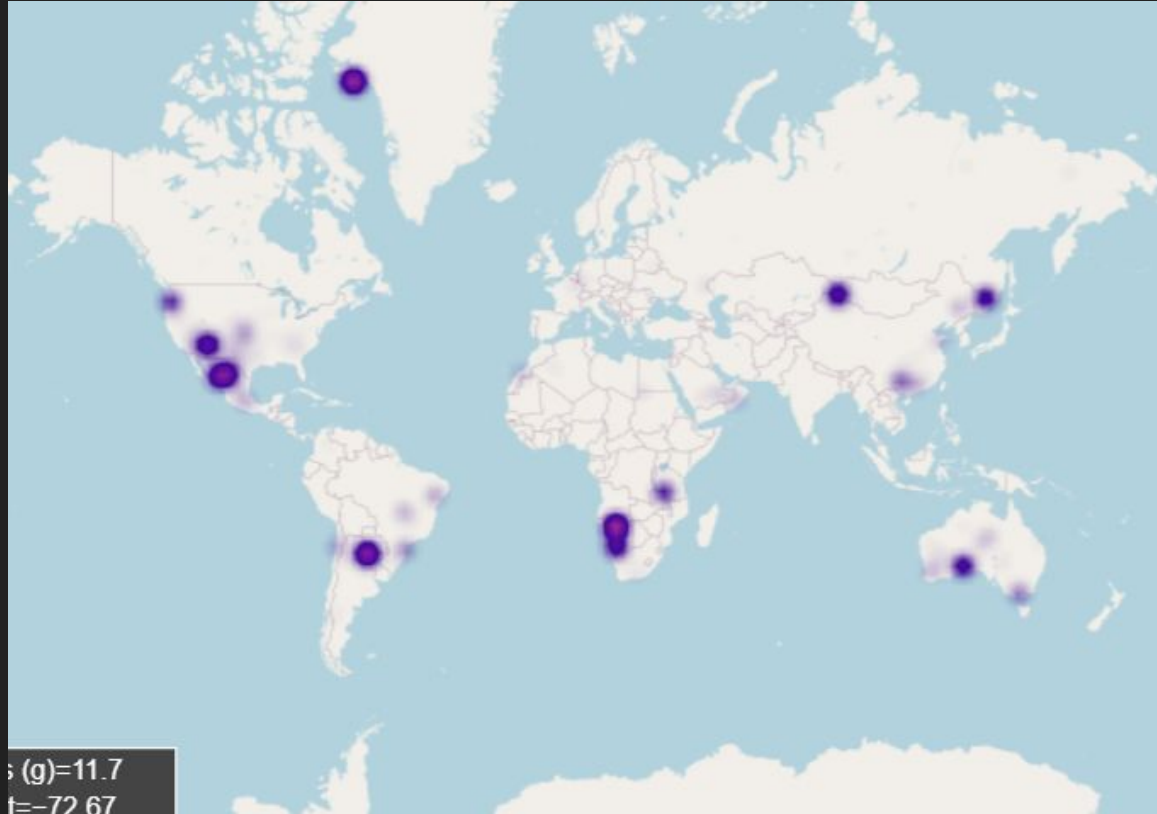

NASA dataset from data.gov

- Years (the year 800 to the year 2100)
- Geographic data: the discovery of null island
- Mass: a few grams to 60 million grams

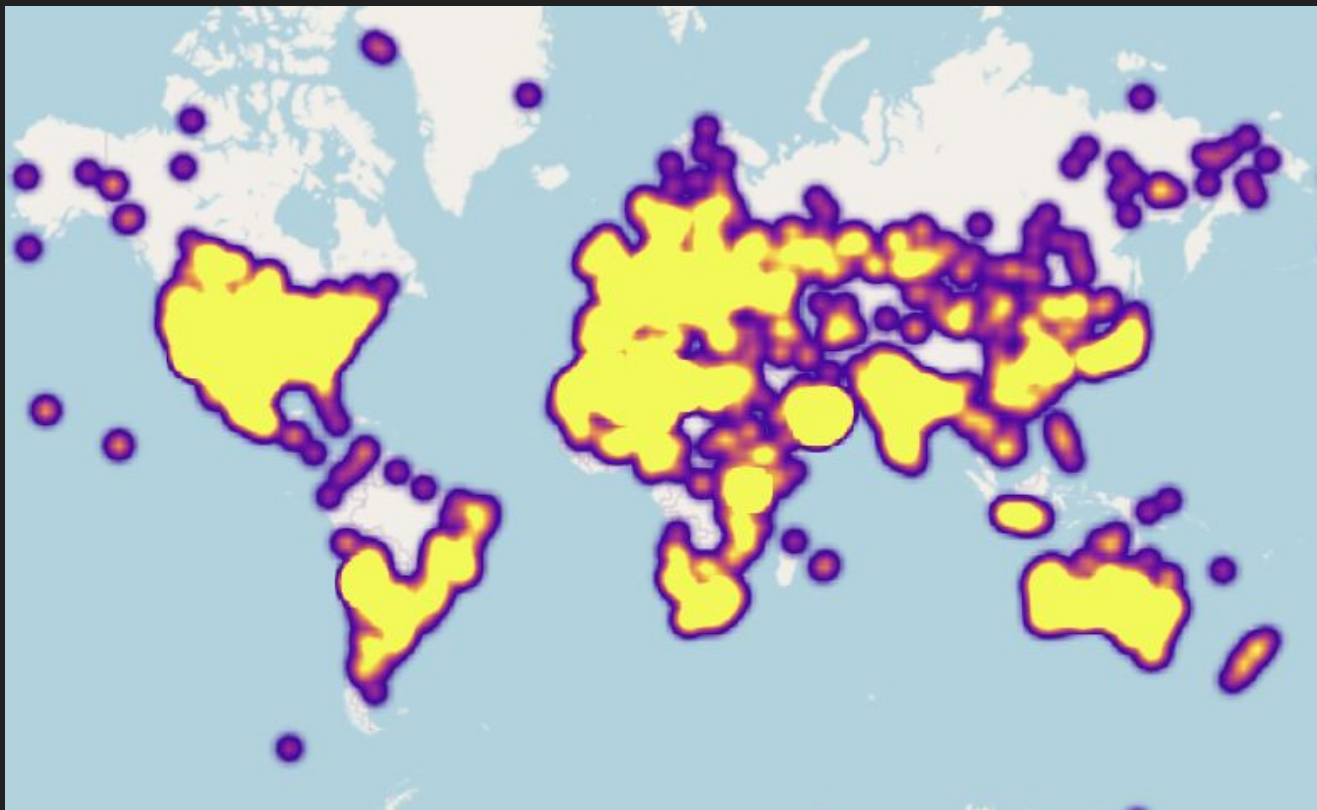

Research Question

Are there locations on earth that are particularly prone to (or safe from) meteorite landings?

Geographic Snapshot (including mass)

Geographic Snapshot (excluding mass)

United States - Contiguous 48
